Tax System Explained Using Beer!

This was sent to me by email, and when I read it I thought it had simplified the tax system - I certainly had never been able to explain it like this!

What do you think?

Suppose that every day, ten men go out for beer and the bill for all ten comes to \$100...

If they paid their bill the way we pay our taxes, it would go something like this:

The first four men (the poorest) would pay nothing.

The fifth would pay \$1, The sixth would pay \$3, The seventh would pay \$7, The eighth would pay \$12, The ninth would pay \$18, The tenth man (the richest) would pay \$59.

So, that's what they decided to do!!

The ten men drank in the bar every day and seemed quite happy with the arrangement, until one day, the owner threw them a curve ball. "Since you are all such good customers," he said, "I'm going to reduce the cost of your daily beer by \$20". Drinks for the ten men would now cost just \$80.

Being good mates they still wanted to pay their bill the way we pay our taxes. So the first four men were unaffected. They would still drink for free.

Now what about the other six men? They were after all the paying customers. How could they divide the \$20 windfall so that everyone would get his fair share? They realised that \$20 divided by six is \$3.33. But if they subtracted that from everybody's share, then the fifth man and the sixth man would each end up being paid to drink his beer.

So, the bar owner suggested that it would be fair to reduce each Man's bill by a higher percentage the poorer he was, to follow the Principle of the Tax System they had been using, and he proceeded to work out the amounts he suggested that each should now pay.

And so the fifth man, like the first four, now paid nothing (100% Saving). The sixth now paid \$2 instead of \$3 (33% saving), The seventh now paid \$5 instead of \$7 (28% saving), The eighth now paid \$9 instead of \$12 (25% saving), The ninth now paid \$14 instead of \$18 (22% saving), The tenth now paid \$49 instead of \$59 (16% saving). The six are better off than before and the first four continued to drink for free.

But, once outside the bar, the men began to compare their savings. "I only got a dollar out of the \$20 saving," declared the sixth man. He pointed to the tenth man and said "but he got \$10!"

"Yeah, that's right," exclaimed the fifth man. "I only saved a dollar too. It's unfair that he got ten times more benefit than me!" "That's true!" shouted the seventh man. "Why should he get \$10 back, when I got only \$2? The wealthy get all the breaks!"

"Wait a minute," yelled the first four men in unison, "we didn't get anything at all. This new tax system exploits the poor!" The nine men surrounded the tenth and beat him up.

The next night the tenth man didn't show up for drinks, so the nine sat down and had their beers without him. But when it came time to pay the bill, they discovered something important. They didn't have enough money between all of them for even half of the bill!

So this! Boys and Girls, journalists and government ministers, is how the Taxation System works. The people who already pay the highest taxes will naturally get the most benefit from a tax reduction.

Tax them too much, attack them for being wealthy, and they just may not show up any more.

In fact, they might start drinking overseas, where the tax atmosphere is somewhat friendlier!!!

A few funnies

Morris an 82 yr old man went to Dr for a physical. A few days later the doctor saw Morris walking down the street with a gorgeous young woman. A couple of days later the Dr spoke to Morris and said "Youre doing great aren't you?" Morris replied "Just doing what you said, Doc—Get a hot mamma and be cheerful. Dr bewildered said "Youvé got a heart murmur, be careful!"

A little old man shuffled slowly into ice cream parlor & pulled himself slowly painfully up onto a stool.

After catching his breath, he ordered a banana split.

The waitress kindly asked , Crushed nuts?

No, arthritis!!

Two young boys walked into a pharmacy one day, picked out a box of TAMPONS and proceeded to the checkout counter. The man at the counter asked the older boy, "Son, how old are you?" "Eight," the boy replied. The man continued, "Do you know what these are used for?" The boy replied, "not exactly, but they aren't for me. They're for him. He's my brother. He's four. We saw on TV that if you use these you would be able to swim and ride a bike. Right now, he can't do either."
